MISSOURI BOTANICAL GARDENE GEORGE ENGELMANN PAPERS

DEAR DOCTOR,

WELCOME BACK TO THE LAND OF DUST

AND SKY! I AM TIED DOWN HERE FOR SOME DAYS
TO COME, AND CAN'T MAKE THE CALL DE RIGUEUR.

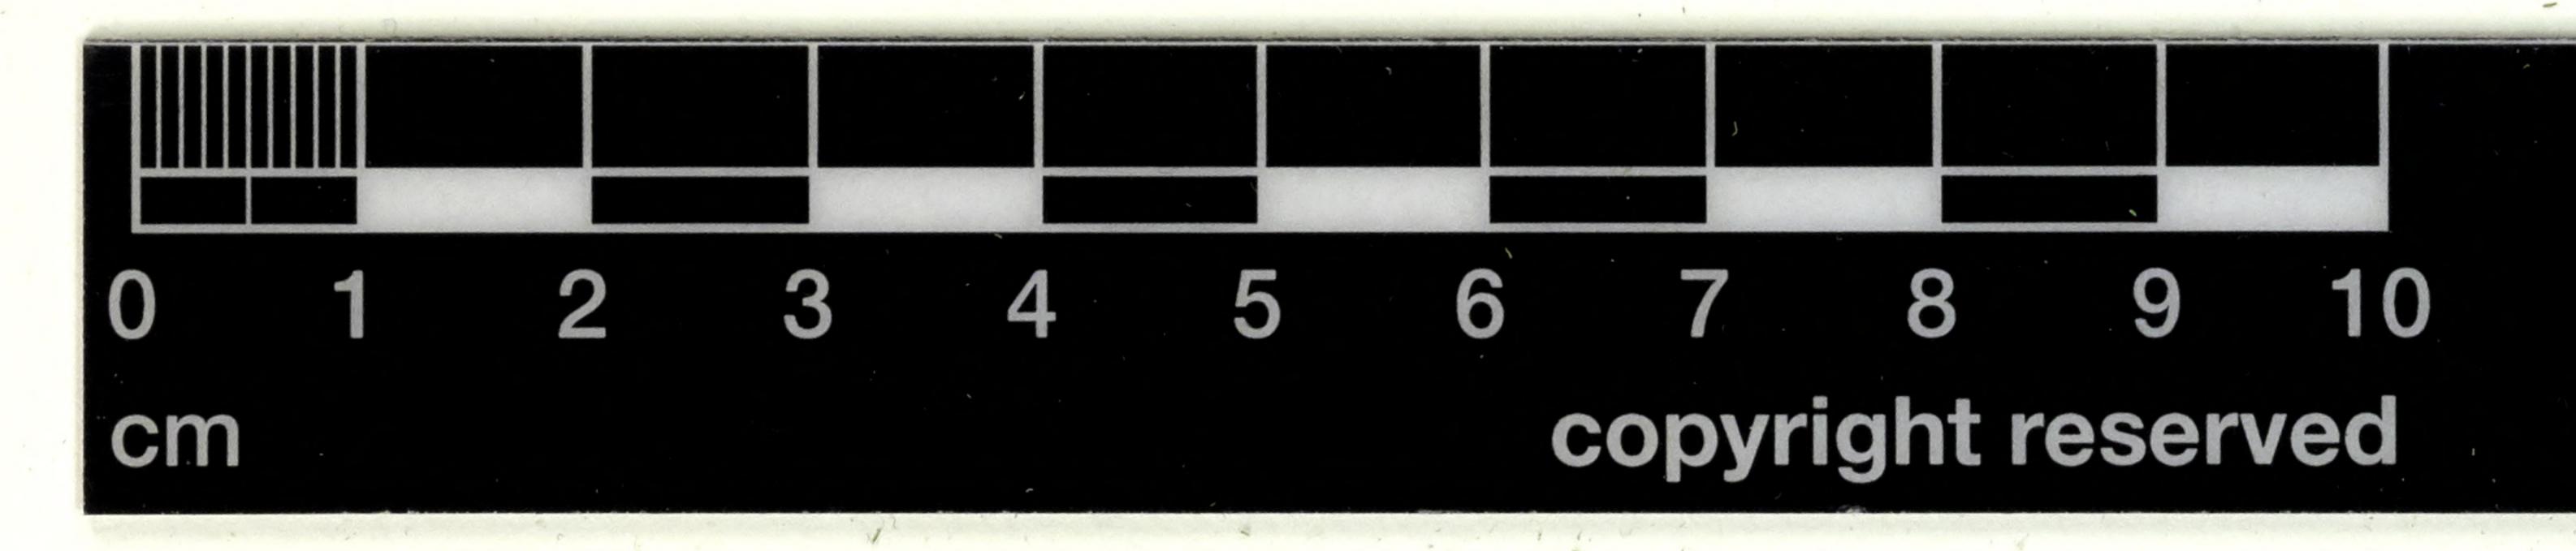

SUPPOSE YOU WAIVE THAT CEREMONY, AND COME OVER
TO TAKE A 'SPELL' OF REST AFTER YOUR ARDUOUS
EXPERIENCES UP NORTH. ALL, INCLUDING ESPECIALLY
LITTLE ALICE, WILL BE DELIGHTED TO SEE YOU!

I PRESUME YOU CAME IN COMPANY WITH MRS.

SCHULZE, ON WHOM MY WIFE WANTS TO CALL PROMPTLY
AND AS SHE WANTS TO GO FRIDAY AND MAY NOT FIND
YOU IN AT THE HOTEL, I WOULD ASK YOU TO TELEGORIEST TO ME HER ADDRESS IN CASE YOU KNOW IT.

AU REVOLE!

VOURS FAITHFULLY

& Son, of proimportant annuany This shows conclusively there is a remarks suffered useful friends have preliminary Douglas Larches this great demand for these beautiful and to to the subject. want of attention raised by our friends Robert Western these few millions of Evergreens Our With shall proceed for the Waukegan. ductions. matter.

time the With to get their trees In requently hundreds of miles away, the planting years, more or less, and surest properly planted it invariably fail; but as many sometimes For ordinary sized Evergreens, a flour barrel turn-ed over the transplanted tree till the 15th of May of evergreens the roots with is to open it immediately, wet the roots with water, not too cold, and heel them in immediately freezing. this latitude will pretty surely save it. W this precaution it would be pretty sure swell. before time. way is to protect the transplanted tree from best to transplant Evergreens just at the hard begin to right plant month found best My plan on receiving a bale and the trees are properly removed and the 100 others as well as myself have Evergreen planting, I have After an experience of fifteen out this precaution it would Will the spring that the buds effects of cold winds, snows at had In this case quite early in April--over cannot always be done few my experience I have very time proper time. this

proving, as it would seem, that a light soil and thorough drainage are necessary to bring it to its highest state of perfection. I have not before heard of so fine a specimen on this side of the Atlantic.

112 BEACON STREET, BOSTON, February 18th, 1875.

PROFESSOR CHARLES SPRAGUE SARGENT:

My dear Sir:

herewith send you the statement regarding the growth of the Lilium auratum at Cohut, 1874, and other circumstances which seem to bear upon the case.

Mrs. Augustus T. Perkins began to cultivate the Lilium auratum in her garden at Sandan wood so early as 1871.

position of the garden is on a bluf The garden is surro edge Cohut Bay original the producing nothing The from overlooking trees. distant bank about forty feet. pine and five feet high, yellow. sand, Northwest, dwarf oak. The mere with
